PAYMENT INDEX

The Payment Index is a key figure and variable that shows the payment behaviour characteristics of companies. This analysis lists the payment experiences registered for the company in question. The Payment Index consists of data gathered by Bisnode Danmark's business partners with respect to their customers' payment patterns.

The Payment Index is weighted for invoiced amounts. If a company has a Payment Index of 80, this means that on average the company pays its invoices on the due date. A Payment Index over 80 means that the company pays its invoices before the due date, whereas the opposite is the case with a Payment Index under 80.

On the following page, the company's payment trend is compared to the relevant business segment median. This illustrates the payment experiences for the company in relation to the general payment experiences within the business segment. The payment trend is compared to the business segment for Other specialised construction activities.
